Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: **the first species**, comprising each of the first and second side walls having lateral wall section which extend beyond the rear wall of the housing to define a flat planar surface for lying flush against the supporting member when the electronic housing is mounted thereon, the rear wall of the housing and extending lateral wall sections defining there between and with the supporting member a channel for routing electrical wires (figure 6; claim 1), **the second species**, comprising a plurality of connectors, each connectors of the plurality of connectors being receivable in a corresponding one of the open slots, the connector being attachable to the supporting structure to selectively secure the electronic housing thereto (figures 1-5a; claims 2-13); **the third species**, comprising the front wall of the electronic housing including a first front surface portion and a second front surface portion residing at an angle to the first front surface portion, and wherein the electronics housing further includes at least one coaxial connector mounted on the angled second front surface portion (figures 1, 6 and 11; claims 14-16) and **the fourth species**, comprising an enclosure for receiving a plurality of electronic housing, the enclosure having at least one planar panel, the planar panel having a plurality of spaced apart openings formed through the thickness thereof, and a plurality of connectors being interchangeably receivable in a corresponding slot, each connector having a main connector body and a pin mounted on an extending therefrom, the pins being received

in corresponding openings of the plurality of spaced-apart openings formed in the planar panel of the enclosure (see figure 1 and 6; claim 17).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
